

Project Design Phase-II
Technology Stack (Architecture & Stack)

| | |
|---------------|--------------------------------|
| Date | 19 February 2026 |
| Team ID | LTVIP2026TMIDS81807 |
| Project Name | BookNest: Where Stories Nestle |
| Maximum Marks | |

Technical Architecture:

The Deliverable shall include the architectural diagram as below and the information as per the table1 & table 2

Table-1 : Components & Technologies:

| S.No | Component | Description | Technology |
|------|------------------------|---|--|
| 1. | User Interface | Web interface for customers, sellers, and admin dashboards | React.js, HTML, CSS, Bootstrap, Material UI |
| 2. | Application Logic-1 | Authentication & Role Management | Node.js, Express.js, JWT |
| 3. | Application Logic-2 | Book browsing, cart management, and order processing | Express.js REST APIs |
| 4. | Application Logic-3 | Inventory management and order status handling | Node.js Controllers |
| 5. | Database | Stores users, sellers, books, and orders data | MongoDB, Mongoose |
| 6. | Cloud Database | Cloud-hosted NoSQL database for storing application data with scalability | MongoDB Atlas |
| 7. | File Storage | Book images and related media storage | IBM Block Storage or Other Storage Service or Local Filesystem |
| 8. | External API-1 | HTTP communication between frontend & backend | Axios |
| 9. | External API-2 | Not Applicable | — |
| 10. | Machine Learning Model | Not used in this project | — |

| | | | |
|-----|---------------------------------|------------------------------|----------------------|
| 11. | Infrastructure (Server / Cloud) | Local development deployment | Node.js Local Server |
|-----|---------------------------------|------------------------------|----------------------|

Table-2: Application Characteristics:

| S.No | Characteristics | Description | Technology |
|------|--------------------------|--|-------------------------------|
| 1. | Open-Source Frameworks | Frameworks used to build UI & Backend APIs | React.js, Express.js, Node.js |
| 2. | Security Implementations | Role-based authentication, encrypted passwords, protected routes | JWT, bcryptjs, Middleware |
| 3. | Scalable Architecture | 3-Tier architecture separating UI, backend logic, and database | REST Architecture, MongoDB |
| 4. | Availability | Web application accessible anytime through browser | Node.js Server |
| 5. | Performance | Fast API responses and asynchronous communication | Axios, Express.js |
